

Hello, Everyone

# IHOR VASYLENKO

## FRONT-END DEVELOPER

### ABOUT ME

I'm a Front-end developer with experience in creating SPA, using React, Redux, HTML, CSS, JS. Now I am improving my skills in this direction and expanding them with new technologies. My next goal is to study Node.js. Also I have interest in learned React Native, and I have an interest in boosting my English to C1 level.

My free time is dedicated to Codewars, programming tutorials, improving my English, and becoming familiar with NodeJS, because, in the future, I see myself as a Full Stack Developer.

Would like to find project work in a company with a modern approach to development and a collaborative team.

I am ready for both full and part-time employment on a project, ready to work in the office or remotely.

Open to your suggestions.

### WORK EXPERIENCE

#### Software Engineer

Freelance | Dec 2020 - present

- taking part in developing Redux State applications and architecture (DAL, BLL, UI layers), developed page, modal windows, tests, menu, and design.
- using next developer technologies: React/Redux/ReduxThunk/Redux-toolkit/RestAPI/Axios/ Formik/MaterialUI/Formik/SCSS, etc
- experience in cross-browser, adaptive, responsive development, CSS-preprocessors.
- implemented flow-authorization, notification, forms (Formik and Redux-form).
- created Unit tests, Snapshot tests, component views in Storybook.
- translated the application to the Redux Toolkit to set a clear and understandable flow and simplify debugging in the future.
- performance enhancement (React.memo, useCallback, useEffect etc.)
- translating the application from classes to functional components in accordance with the new standards.
- migration to Typescript.

#### Civil Engineer

P&M Sp. z o.o. Warszawa | 2017-2020

- study of technical specifications, preliminary planning, project development, calculations, preparation of documentation, approval and presentation of work, implementation of field supervision of the process.
